ALL IMAGING SYSTEMS

100% PRECISION TESTING

ALL THE SYSTEMS. ALL THE TIME.
Now exceeding 20 years in the ultrasound industry, All Imaging Systems continues to strive for customer satisfaction for both local and international clients. We know your patients depend on you, that’s why you can depend on us. With experienced technicians and consultative sales, AIS delivers confidence from inception to delivery. We provide our customers access to ultrasound machines that are refurbished or new, as well as always-available knowledgeable support. Our unique screening & testing process delivers guaranteed quality. Precision testing for All the Systems, All the Time.
All Imaging Systems believes that the original care, performance and innovation that the manufacturers put into their ultrasound systems has to be fully restored before they leave our company. That’s why we put each of our systems through a rigorous 32 step testing we call the All-n-All Screening & Testing Process. That means if any part is not up to the original specifications we will replace it. We know only 100% functioning parts produce 100% quality images.

NOT WORKING TODAY.

GET A REPLACEMENT BY TOMORROW.

An ultrasound system that is not working is causing your facility stress and inconveniencing your patients. We know the frustration that a down system can create. That's why we don't waste any time in getting a replacement system out to you as soon as possible. That means depending on your location, you can be back up and running the very next day. Every one of our systems are not only fully tested they are fully supported. We stand behind every system with a 100% Satisfaction Guarantee.
SPEND LESS MONEY. HAVE LESS IMPACT ON THE ENVIRONMENT.

From the beginning, All Imaging Systems has had a global commitment to not only deliver refurbished ultrasound systems to save customers money, but also to help save the earth. Reducing the environmental impact of technology has been a part of the AIS mission for over 20 years. Our manufacturer partners know that we will use every part of their system on a resale, or we will recycle the materials for other uses. Being in the healthcare business is more than just treating ailments it’s also doing our part to decrease harmful waste. That’s why we don’t just rebuild systems to be like new, we recycle old system’s parts and materials to help renew the earth.
